IN THE UNITED STATES PATENT & TRADEMARK OFFICE

Applicant: Jeffrey A. Trogolo

Serial No. 10/032,370 : Group Art Unit: 1615

Filed: 21 December 2001 : Examiner: Berko, Retford O.

For: HIGH ASPECT RATIO ENCAPSULATED INORGANIC
ANTIMICROBIAL ADDITIVE FOR CONTROLLED RELEASE

CERTIFICATE OF MAILING

I hereby certify that this document and the herein referenced Form PTO-SB/08A, Japanese patent translations and International Patent Application are being deposited with the US Postal Service on this the 24th day of January 2005 with sufficient postage as First Class Mail in an envelope addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 under the provisions of 37 CFR 1.8.

Edward K. Welch II

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

COMMISSIONER FOR PATENTS
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 C.F.R. §§1.51(b), 1.56, 1.97 and 1.98, Applicants herewith draw the Patent Office's attention to the documents that are listed on the attached Form PTO/SB/08A. Copies of the International PCT and of translations of the cited Japanese documents are enclosed.

Applicants respectfully request that each of these documents be considered, made of record herein, listed on a "Notice of References Cited" to be issued in this application and printed on any patent that may issue from this application. Applicants also request that a copy of the attached Form PTO/SB/08A, initialed by the Examiner, be returned to Applicants' attorney together with the next communication indicating that these documents have in fact been considered.

The following is a brief summary of the relevance of each of the listed International and foreign documents being presented.

JP8175210 – Taki Chem Co Ltd – discloses antimicrobial agents and the method of producing the same wherein said antimicrobial agent is prepared by copolymerizing various acrylic esters in the presence of a radically

polymerizable material having one or more sulfonic acid groups and an aqueous solution of an antimicrobial metal ion. The so-formed acrylic copolymer material has antimicrobial metal ions bound thereto through the sulfonic acid group which is now a salt of the antimicrobial metal ion.

JP4066512 – Sintokogio Ltd – discloses the coating of individual particles of various antimicrobial agents with a non-hygroscopic polyurethane resin by mixing the antimicrobial particles in the precursor materials for the polyurethane resin and then polymerizing the same.

WO03055941 – Trogolo et. al. – disclose encapsulated antimicrobial agents generally and antimicrobial compositions containing the same but fails to reference the aspect ratio as presently claimed. This publication is the International PCT equivalent to Applicants' copending United States patent application, USSN 10/032,372, filed concurrently with the instant application and previously identified to the Patent Office.

This Supplemental Information Disclosure Statement is being filed pursuant to 37 CFR 1.97(b)(4), concurrent with the filing of a Request for Continued Examination (RCE); thus no fee is required. No representation is made or intended that a prior art search has been made or that no better art than the listed is available.

Respectfully Submitted
